
 Prevent your trough from being the source of costly ice damming by keeping your trough free flowing year round.

 Gutter Insert Pro™ makes it virtually impossible for leaves or pine needles to enter the trough, so they remain clean and free flowing.

 Handles the highest water capacity of any trough protection system on the market.

 Because Gutter Insert Pro™ completely seals out leaves it also prevents **Birds, Bees and Mosquitoes** from entering and breeding in your trough.

 **Biocide and Fungicide** inhibits growth of mold, mildew, fungus, algae and moss.

 **UV Stabilizer** prevents degradation from the sun.

Fill it and forget it!

Without a doubt, Gutter Insert Pro™ is the most practical type of trough protection. If you've got anything in your eavestrough it should be Gutter Insert Pro™

Problem	Solution
Ice & snow buildup	Gutter Insert Pro™
Pine needle clogging	Gutter Insert Pro™
Leaves	Gutter Insert Pro™
Insects nesting	Gutter Insert Pro™
Metal roof (sliding snow removes trough)	Gutter Insert Pro™

What's in your eavestrough?

*Gutter Insert Pro™ carries a 25 year transferable no clog warranty

Brochure created by Angela McKellar Designs
angela@angelamckellardesigns.com

Gutter Insert Pro™ seals out ice, snow, pine needles and leaves while allowing an enormous volume of water to flow through quickly.

No other gutter cover, gutter screen, or guard system works as effectively to keep debris from entering your gutters.

The New Wave of Gutter Protection
Invisible, Effective, Affordable

Gutter Insert Pro™ Advantages

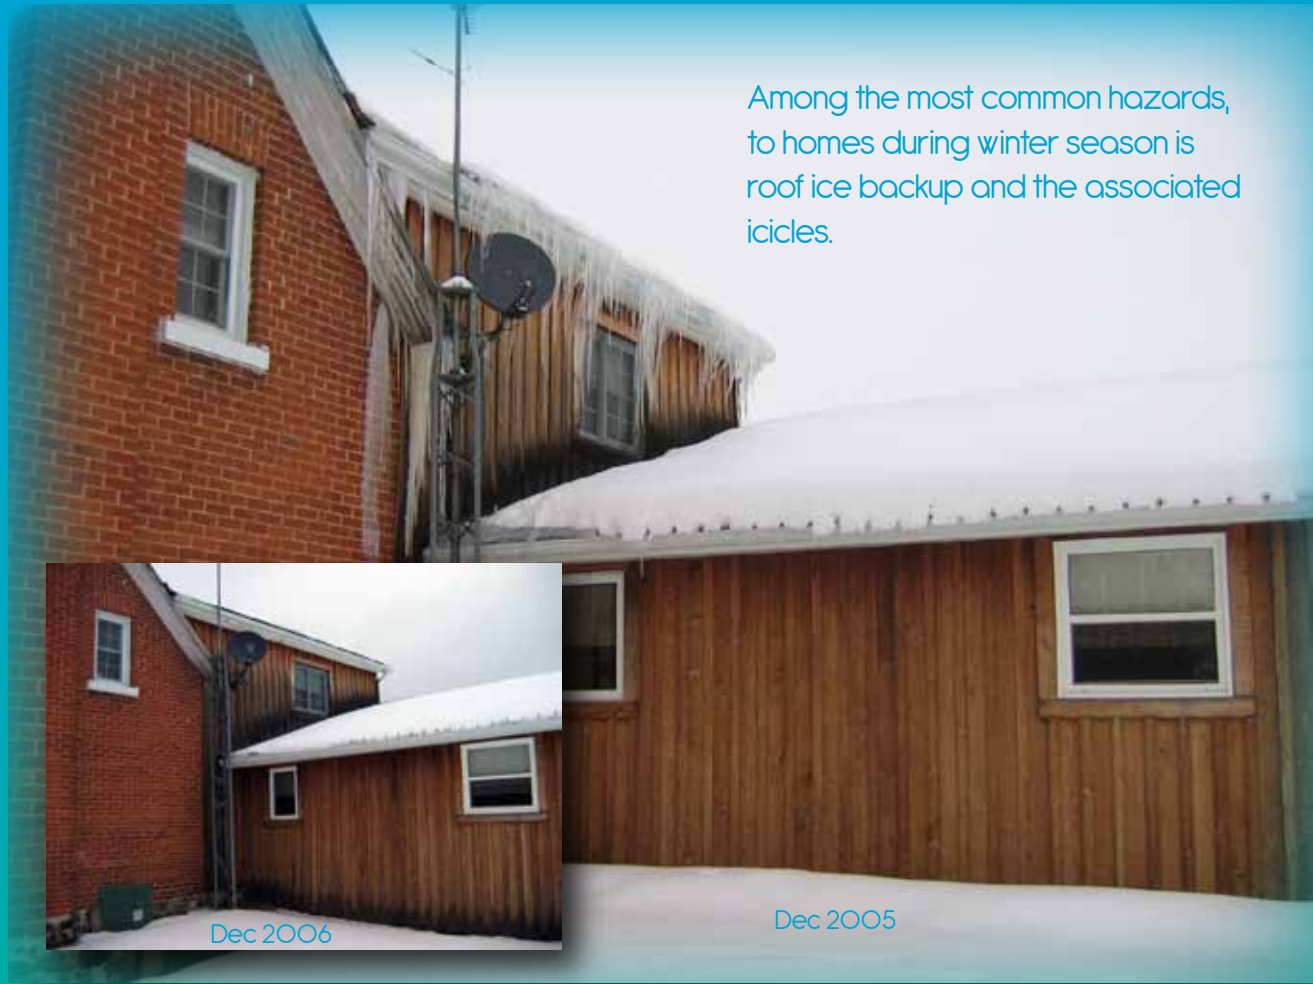

Gutter Insert Pro™ is an exterior-grade polyether foam filter, shaped and cut to fit snugly in your eavestrough.

Gutter Insert Pro™ prevents leaves, pine needles, ice and snow from entering your eavestrough. Your trough will remain clean and free of clogs for at least 25 years *

Clogged/ice dammed eavestrough can cause water damage to your home. Gutter Insert Pro™ protects your home from foundation problems, rotting windows or other exterior rotting, Also protects against mold, mildew and insect infestation.

Gutter Insert Pro™ soft texture cannot be damaged by falling tree debris, will not void other warranties and there are no screws to fix to the roof, or risk of damaging shingles. It simply sits in your gutters year after year performing flawlessly.

“Fill it and forget it!”

Among the most common hazards, to homes during winter season is roof ice backup and the associated icicles.

Gutter Insert Pro™ eliminates this hazard.

Water doesn't freeze* it flows year round.

*tested -6OC - +5OC (daylight conditions).
